DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Claims 1-11 and 25-40 in Paper No. 8 is acknowledged. The traversal is on the ground(s) that the search for the apparatus and the method/computer readable medium would be the same and that some of the claims could not be practiced in a cd recorder. This is not found persuasive because the MPEP section referred to in the last Office Action recognizes that method and apparatus claims may be properly restricted if the method invention may be practiced by a materially different apparatus. It is Applicant's belief that some of the claims cannot be practiced by a cd recorder. Therefore, Applicant admits that some of the claims may be practiced by a cd recorder. Thus, the restriction is proper.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-4,7-11 and 25-40 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Hayashi et al. (6,375,297).

4. With respect to Claim 1, Hayashi teaches the forming step in his claim 3 and figure 15, the entering step in his claim 1 and the storing step in his claim 3(reception means). With respect to Claim 2, Hayashi teaches the columns of print elements shifted less than the amount at which the print elements are arranged in figure 15. With respect to Claim 3, Hayashi teaches the nonvolatile memory(storage means) in his claim 3. With respect to Claims 4,31,35,39, Hayashi teaches subscan feeding higher density in figure 8. With respect to Claim 7, Hayashi teaches the inkjet printer in the Abstract. With respect to Claims 8,10,26,34,38, Hayashi teaches the speed and distance adjustments in his claim 2(wherein clause) based on temperature in his claim 5. With respect to Claims 9,11,32,36,40, Hayashi teaches the thermal inkjet printer in column 2, lines 36-47. With respect to Claim 25, note the rejection of Claim 1 above and Hayashi's teaching of a storage medium in his claim 22. With respect to Claim 27, Hayashi teaches the first and second memory means in his claim 8-9. With respect to Claim 28, Hayashi teaches the distance(gap) on the front page diagram. With respect to Claim 29, Hayashi teaches the ejection speed in his claim 2. With respect to Claim 30, Hayashi teaches the nonvolatile memory 25 on the front-page diagram. With respect to Claims 33,37, note the rejection of Claim 1 and that Hayashi teaches the temperature detection 28 on the front-page diagram. Applicant **cannot rely upon the foreign priority papers to overcome** this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15. **An unavoidably necessary part of the next response to this Office Action is a sworn English translation of the foreign priority papers.**

5. Claims 1-4,7,9 and 25 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by EP 0 895 869 A2 to Shimada et al.

Allowable Subject Matter

6. Claims 5-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

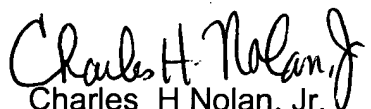

7. The following is a statement of reasons for the indication of allowable subject matter: The total combination of Claim 5 or 6 is not taught and/or rendered obvious by the prior art of record..
